---

## SUMMARY

I specialize in unlocking data value for businesses by utilizing predictive modeling, optimizing supply chains, and building recommendation systems, enabling informed decision-making with actionable insights.

---

## EXPERIENCE

### Python Backend Developer

Yogleads

June 2023 - Present, Noida

- Successfully refined and expanded functionalities of getPerson, getProspect, and getPersona APIs as assigned tasks.
- Utilized Python and Flask framework to develop APIs, ensuring efficient backend functionality.
- Developed APIs and browser extensions leveraging LinkedIn data, delivering valuable insights to users.

### Data Scientist Associate - 3 Months

Blackcoffer

April 2022 - June 2022, Delhi

- Demonstrated strong problem-solving skills by effectively addressing client problems and fulfilling their requirements using appropriate tools.
- Enhanced communication and interpersonal abilities through successful collaboration with diverse developers to meet client expectations.
- Cultivated expertise in working with clients from diverse backgrounds and used my interpersonal skills for effective client interactions.

### Data Annotator - 6 Months

Strata Unison New York

September 2021 - February 2022

- Achieved high accuracy and precision in annotating 5000+ images, ensuring reliable data for analysis.
- Strata simplifies transportation planning and infrastructure management, streamlining complex processes for efficient decision-making.
- Leveraged Strata to streamline transportation planning and infrastructure management, improving operational efficiency and decision-making.

### App Developer Intern - 4 Months

Ananta Resource Management

May 2021 - August 2021, Mumbai

- Developed Naukri portal and Yatri Bhavan apps using Microsoft's Power Apps for seamless functionality.
- Created visually appealing UI designs for apps using Figma, ensuring user-friendly interfaces.
- Enhanced knowledge and presentation skills by delivering presentations on technical and non-technical topics at ARM.

---

## EDUCATION

### B.Tech in CSE, Specialization in Data Science

D Y Patil International University • Pune, India • 2023

---

## PROJECTS

### Mood-based Music Recommendation System Using Brainwaves (Research Project)

January 2023 - Invalid date

- Developed a highly effective EEG-based music recommendation system, enhancing user listening experience and emotional well-being.
- Successfully extracted features from EEG dataset, classified signal into mood categories, & provided personalized music recommendations.
- Leveraged EEG technology to improve user satisfaction and engagement through personalized music recommendations.

---

## INVOLVEMENT

### Data Science Code-a-thon Contest

TECHGIG

- Secured Rank 1 in the Data Science Code-a-thon Contest, recognized for exceptional performance and exemplary contribution on TechGig.com.
- Awarded for outstanding achievement and contribution in the field of data science during the Code-a-thon Contest on TechGig.com.
- Recognized as the top performer and recipient of the award for outstanding performance in the Data Science Code-a-thon Contest on TechGig.com.

---

## CERTIFICATIONS

### Microsoft AI Classroom Series

Microsoft • 2021

The earned certification from Microsoft demonstrates expertise in AI concepts, enhancing the capabilities of Python developers and Data Scientists.

---

## SKILLS

Python, Machine Learning, Deep Learning, Web-Automation, Tableau, Power BI, Java, MySQL, R Programming, HTML, CSS, Javascript, PHP, Big Data, NLP, Statistics & Probability, Google Big Query, Google Data Studio, Amazon Linux, Tensorflow Framework, R Shiny, Docker, Data engineering, Computer Vision, Data Mining, Flask, API, Git & Github, Ubuntu.
